

# JavaScript For Web

Week 3, Tutorial 5

## Resources for Final Project

- [HTML5 UP](#): Free HTML website template
- [Unsplash](#): Free images resources
- [Video: What is Agile Methodology](#)
- [Video: What is Scrum](#) (You can treat the last two weeks of this course as a **sprint** of your project.)
- Common project management softwares: [Jira](#), [Trello](#), [Notion](#)

## Assignment 2, Exercise 4

Create a file named `exercise4.js` and copy all of code from `exercise3.js` . You will continue work on build this Note App and you can add the following code to your html

```
<div>
  <label for="note">Enter a new note:</label>
  <input type="text" name="note" id="note">
  <button>Add new note</button>
</div>
```

Follow the "Web Dev Notes App: Button for adding a new note" in `lecture-3-5.pdf` and create a similar button for adding new JavaScript notes.

You will create `assignment2.zip` including `exercise4.js` and submit to Canvas. You don't have to submit your `html` file.
