JavaScrip For Web

Week 2, Tutorial 1

More JS Knowledge Check Questions

- Review the knowledge check questions in `tutoria-1-4.pdf`
- What are the three logical operators, and what do they stand for?
- What are truthy and falsy values?
- What are conditionals?
- What is the syntax for an if/else conditional?
- What is the syntax for a switch statement?
- What is the syntax for a conditional operator?

My suggestion for knowledge check:

- Review the previous slides and try every JavaScript code examples on console in your browser inspector.
- Read the MDN web docs and find more examples.

Readings

- Don't forget review HTML and CSS.
- Watch Kevin Powell's HTML & CSS for beginners.
- You can consider watching these videos as the part of preparation for our final project.
- For the final project, You will develop a website/webpage individually based on your skill sets. Start to think about the topic about your website/webpage. It could be anything, and it might be used for, for example, your self interests, personal website, your business/company, career, learning a new JS framework, etc. The **KEY** is that find out something you really want to spend some time working with.
- We will talk more about the final project in week 3.
