# JavaScrip For Web

Week 1, Tutorial 1

# Tutorial 1: Setup your dev environment

1.1) Install Chrome
1.2) Install VSCode

- Check this VSCode Tutorial

1.3) (optional) Setup Git and Github

- Create a Github account.

- Install Git and Git Desktop.

- Configure Git and Github Desktop, and link your Github account.

- Create a repo on your Github, this repo can be an empty folder with a `README.md` file. Try to play with this Markdown file and add some description about this repo.
